#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite in the use of the phrase "predominantly a single species". Clarification is requested as it the terms seem to indicate that multiple forms of this pharmaceutical may be formed. As understood by this examiner, the claimed pharmaceutical is the combination of a pegylated interferon (or any conjugate of a hydrophilic polymer and interferon) and a biodegradable polymer. The formation of 'species' of this product is not something applicant has particularly pointed out. Applicant is therefore requested to clarify this terminology.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-39 of U.S. Patent No. 6,706,289 (US'289). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'289 discloses the combination of various bioactives conjugated with a hydrophilic polymer and a biodegradable polymer. (see claim 1). Claim 4 sets out the use of the same biodegradable polymers. Bioactives such as interferon, biphalin, somatostatin and enkephalin are found in claim 6. Pegylated conjugates are specifically disclosed claims 5 and 14. Microcapsules of this combination of conjugated bioactive and biodegradable polymer are claimed in claim 7-15. Sizing of those nanoparticles or microcapsules would depend upon the type of delivery desired, so that sizing the particles between 20 and 100 um is a skill within that of the ordinary practitioner of microencapsulation. This ordinary practitioner would know how to vary such particles according to whether they were being delivered orally, mucosally, by inhalation or by injection. Therefore those of ordinary skill in the art would have found it well within their skill to select bioactives such as interferon, biphalin, somatostatin and enkephalin for conjugation with a hydrophilic polymer such as PEG, and further to combine this conjugate with a biodegradable polymer as set out in the

Art Unit: 1615

claims of US'289. Further, the ordinary practitioner would expect similar therapeutic results from the claimed combination given the claims of '289. As such, the instant claims would have been obvious given the claims set out in US'289.
